Profile Summary

Software Engineer skilled in Java, Spring Boot, React.js, REST APIs, Microservices, and AI-powered application development. Strong foundation in Data Structures Algorithms, Object-Oriented Programming, System Design, and Database Management. Experienced in building scalable full-stack applications, integrating Generative AI and Large Language Models (LLMs), and developing secure backend services with responsive user interfaces using MySQL, PostgreSQL, and MongoDB.

Skills

Languages: Java, Python, SQL, JavaScript

Frameworks & Libraries: Spring Boot, Hibernate, React.js, Scikit-Learn, Pandas, NumPy

AI & Machine Learning: Machine Learning, Deep Learning, Generative AI, Prompt Engineering

Databases: MySQL, PostgreSQL, MongoDB, Redis

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management System (DBMS), Operating Systems, Computer Networks

Software Engineering: REST APIs, Microservices, System Design, Agile, CI/CD

Tools & Platforms: Git, GitHub, Docker, Linux, Maven, Postman, VS Code

Projects

MediMind – AI Medical Assistant

React.js, Spring Boot, Gemini API, PostgreSQL

<https://medi-mind-tawny.vercel.app/>

- Developed an AI-powered medical assistant that helps users understand symptoms, medications, and healthcare information using Large Language Models.
- Implemented secure authentication, intelligent chatbot interactions, and responsive UI for seamless healthcare assistance.
- Integrated AI APIs to provide personalized medical guidance while maintaining an intuitive full-stack user experience.

Wandr AI – Intelligent Travel Planner

React.js, AI, REST APIs

<https://wandr-ai-div.vercel.app/>

- Built an AI-powered travel planner that generates personalized travel itineraries based on destination, budget, duration.
- Integrated Generative AI to recommend hotels, attractions, restaurants, and optimized day-wise travel plans.
- Designed a responsive user interface with real-time itinerary generation for an enhanced travel planning experience.

Employee Management System

Spring Boot, React.js, MySQL

<https://github.com/Lucifer-ipynb2/Employee-Managment-System>

- Developed a full-stack employee management system supporting CRUD operations, employee records, and role-based access.
- Designed RESTful APIs with Spring Boot and integrated React.js frontend with MySQL database.
- Implemented search, pagination, validation, and responsive UI to improve usability and performance.

Experience

Data Scientist Intern

May 2026 – Present

Celebal Technologies

- Working on Machine Learning and Deep Learning projects involving data preprocessing, feature engineering, model development, and evaluation.
- Performing Exploratory Data Analysis (EDA) and predictive modeling using Python, Pandas, NumPy, Scikit-Learn, and SQL.
- Developing AI-based solutions using Generative AI techniques for real-world business use cases.
- Collaborating on data pipelines, model optimization, and deployment workflows following industry best practices.

Software Engineering Intern

May 2025 – Jul 2025

Creative Log

- Developed backend applications using Java, Spring Boot, Hibernate, and RESTful APIs.
- Designed and optimized data pipelines for efficient data processing and database operations.
- Worked extensively with MySQL, PostgreSQL, and MongoDB to develop scalable database-driven applications.
- Collaborated with cross-functional teams to develop, test, debug, and deploy production-ready software solutions.

Education

B.Tech CSE (Pursuing)

2023–2027

Poornima University

Class XII

2023

Jim Corbett School

Class X

2021

Springdale School

Certifications & Hackathons

- NPTEL IIT Kanpur – Cloud, IoT & Edge ML
- Participant – Top 10 at DevSummit (Jagannath University)
- Participant – Microsoft Code for Bharat Hackathon
- Participant – Ace Hackathon (UEM) and Quibitix GL Bajaj University Mathura
